2. Snap large wings in place first.

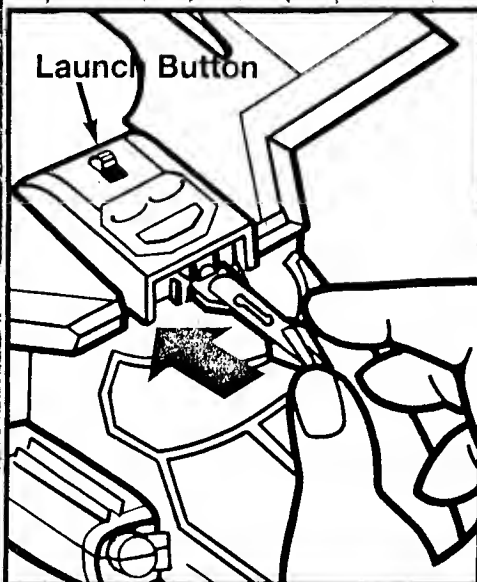

3. The wing rudders pass through the slots in the wing and snap into the body permanently.

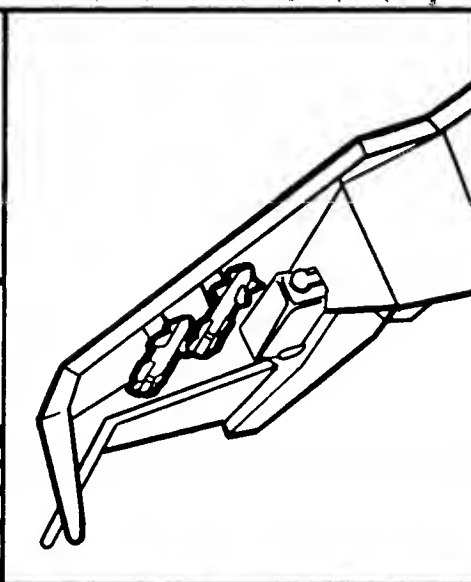

4. Hook the rear wing under the large wing and rotate it down until it snaps in place, one on each side.

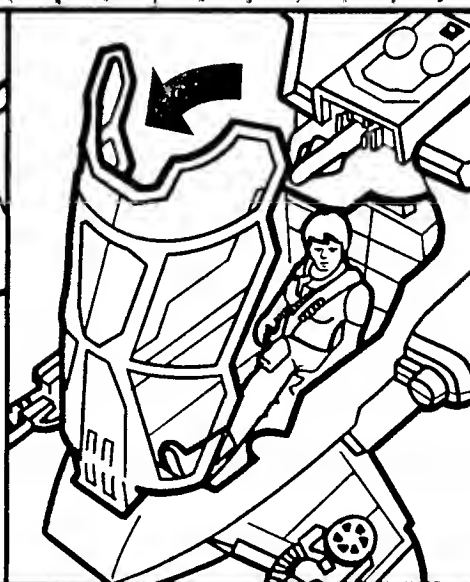

5. Slide front cannon into place. Cannons can rotate 180°.

6. Push missile into missile launcher until it locks in place. Push launch button forward to fire.

7. Store additional missiles under the large wings.

8. Raise cockpit canopy and insert figure into the cockpit.

9. Insert figure into capture pod and snap lid on. Pull the release lever to release the capture pod.
